IHCB RETROFITTERS

Wind Mitigation Specialist

WHY DO THIS?

Many homes built before 2000 only have 1 or 2 nails attaching the hurricane straps to the roof trusses. By retrofitting the straps with the proper fasteners you can reduce the liability on your home and save money on your insurance premiums.

**OUR ANNUAL INSURANCE
WENT FROM \$2950 TO
\$1180. THAT IS A 60%
REDUCTION! THANK YOU
SO MUCH!!**

Julia Morgan

01

How long does it take?

If we are able to access the area from the attic space we can typically finish in less than one day.

02

How much can I save?

It is quite possible to reduce your insurance premiums 25% - 50% annually by using our retrofit services.

03

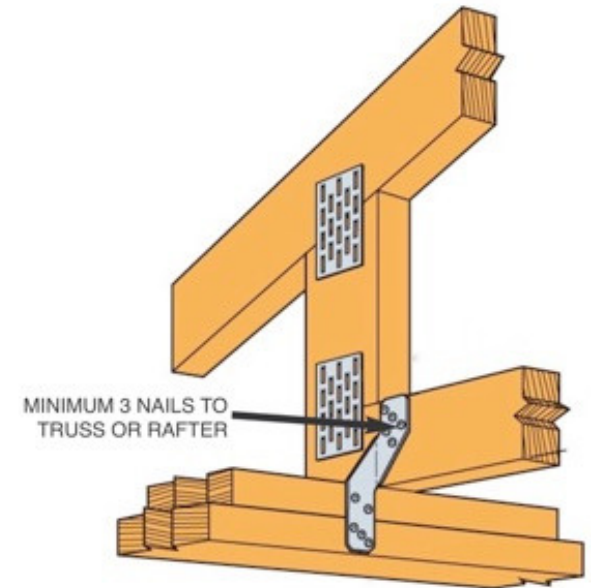

Why do this?

By mitigating your truss straps, you not only save on your insurance premiums, you would add extra uplift protection from high winds to your entire home.

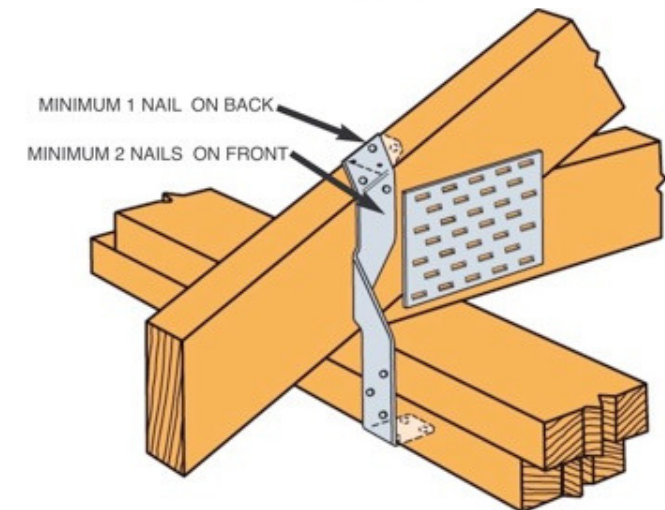

04

Can I get an estimate?

Our contact information is on the back of this brochure.
Give us a call today for a free estimate!
